Bulletin of The East Greenwich Academy

JULY, 1925

Entered at East Greenwich, R. I., as Second Class Matter.

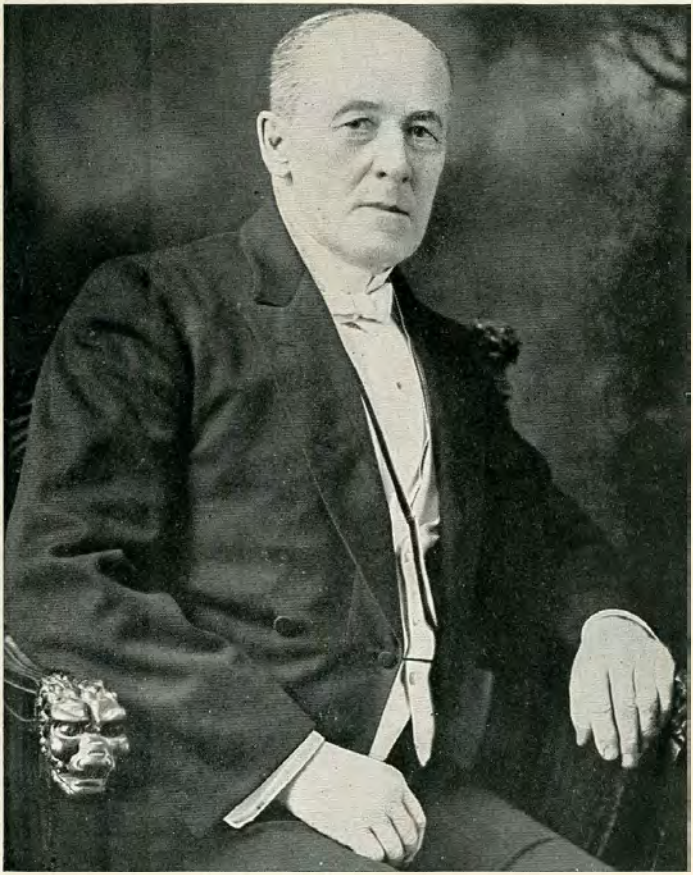

Virginia B. Allen C. H. '26

For almost a century and a quarter, these unpretentious buildings have represented the sacrificing gifts and the patient toil of friends of education. From their beautiful campus, they have looked over the sunlit waters of Narragansett Bay, while thirty successive groups of students have mastered curriculum requirements and gone forth scholars and athletes, preachers and teachers, home makers and masters of the market place, worthy citizens and leaders of men.

The youth of the present generation are invited to join this procession that their progress may be real and toward some definite and worthy goal, with strong and kindly leadership and the stimulating companionship of fellow students, till vague hopes and dreams shall develop into definite aims and the purposes of noble living shall be established.
